---

## SUMMARY

Self-taught Frontend Developer with a background in Electrical Engineering. Builds clean, responsive, and bilingual (Arabic/English) user interfaces using React and modern frontend tooling, with strong problem-solving skills and a fast-learning, self-directed approach to new technologies.

## PROJECTS

### FAY — Bilingual Plant Marketplace

React, Tailwind CSS v4, Vite, React Router, i18next, Lucide React, Context API

Architected and built FAY from scratch — a scalable, localized e-commerce platform connecting users with local plant nurseries via an intuitive digital experience.

- **UI/UX Design & Architecture:** Designed a modern, accessible design system and responsive UI, focusing on visual hierarchy, seamless navigation, and optimal user journeys.
- **Frontend Engineering:** Developed a performant SPA using React, Vite, and Tailwind CSS v4, with a modular component architecture, Context API for state management (auth, cart, search), and custom hooks for reusable logic.
- **API & Data Layer:** Architected a clean, swappable service layer decoupling the UI from data sources (mock/live) with zero component-level changes — enabling smooth integration with backend endpoints.
- **Key E-Commerce Features:** Engineered full user flows including dynamic product filtering, nursery directory, interactive cart, checkout system, and an authentication UI (login/sign-up) built with backend integration in mind.
- **Performance:** Applied code splitting, lazy loading, and memoization to keep the SPA fast and responsive across devices.
- **Globalization & i18n:** Integrated i18next supporting dual Arabic/English localization with full RTL/LTR layout adaptivity and responsive typography.
- **Cross-Functional Integration:** Structured complex data models and partnered with the backend engineer to integrate API endpoints for a seamless end-to-end solution.

### Personal Portfolio

React, Vite

Designed and built a fully custom, responsive portfolio from the ground up to showcase projects, skills, and professional background — with a component-based structure, smooth scroll navigation, and a bilingual-ready interface reflecting the same engineering standards used in production work.

## SKILLS

**Languages & Core:** HTML5, CSS3, JavaScript (ES6+)

**Frameworks & Libraries:** React.js, React Hooks

**Styling:** Bootstrap, Tailwind CSS

**Tools & Workflow:** Vite, Git, GitHub, VS Code, npm

**Core Concepts:** Responsive Design, RESTful APIs, State Management, Cross-Browser Compatibility, Web Accessibility (a11y)

## EDUCATION

### B.Sc. in Electrical Engineering

Technical Institute of Mechanical & Electrical Engineering, Damascus University

## CERTIFICATIONS

Laptop Maintenance Course — Arab Academy for Information Development

## LANGUAGES

Arabic — Native | English — Intermediate
